### National Test of the Wireless Emergency Alert (WEA) and Emergency Alert System (EAS)

On 10/03/18, the Federal Emergency Management Agency (FEMA), in coordination with the Federal Communications Commission (FCC), will conduct a nationwide test of the Emergency Alert System (EAS) and Wireless Emergency Alert (WEA) system.

- The test will assess the readiness to distribute an emergency message nationwide and determine whether improvements are needed.
- At 1118 hours, the WEA test message will be sent to cell phones that are connected to wireless providers participating in WEA.
- At 1120 hours, the EAS message will be sent. EAS is a national public warning system that provides the President with the communications capability to address the nation during a national emergency. The test is made available to EAS participants (i.e., radio and television broadcasters, cable systems, satellite radio and television providers, and wireline video providers) and is scheduled to last approximately one minute.

### Emergency Management Assistance Compact resources provided by Cal OES

In support of Hurricane Florence, Cal OES provided resources to the States of Virginia, South Carolina, and North Carolina under the Emergency Management Assistance Compact (EMAC).

# WEATHER OF CONCERN

## Weather of Concern

- A Flash Flood Watch is currently in effect until 10/03/18 for a portion of southeast California including Imperial, Riverside, and San Bernardino counties.
  - The impacted areas are located directly next to the Arizona border.
  - Remnants of former Hurricane Rosa will lead to periods of showers and thunderstorms through tonight.
- On Wednesday, another early winter storm is expected from the Pacific Ocean that may impact the Holy Fire burn scar area.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

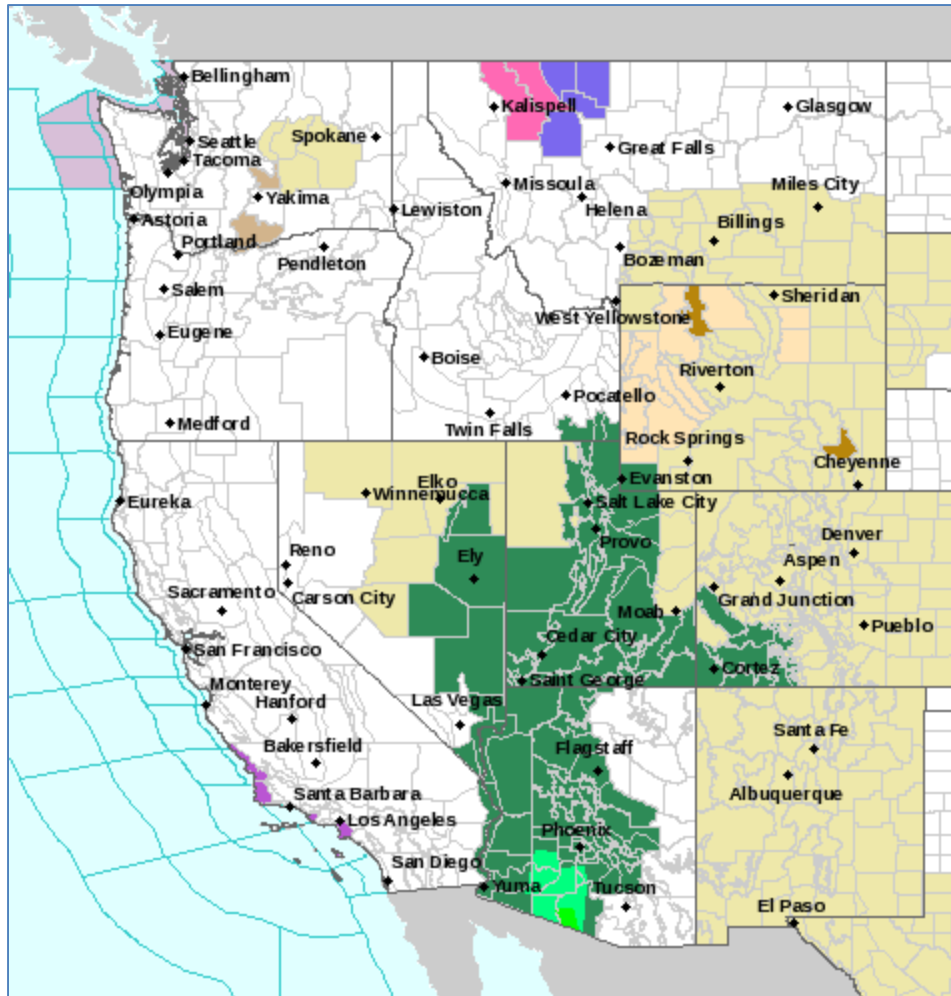

- Cool, moist, unsettled weather through Friday night at least as a couple low pressure systems pass over Northern California.
- Many areas will accumulate more wetting rain.
- The lows depart this weekend, high pressure moves into place off shore for warming/drying/windier trend.
- Strong, gusty N to NE wind developing Saturday afternoon, lasting through Sunday, speeds possibly becoming 20-30 mph with gusts 40-50 mph windiest locations then much lighter Monday.
- Temps 5-8 degrees below normal into the weekend (warmest inland areas mid/upper 70s), then warmer Sunday into early next week (warmest inland areas low/mid 80s).

## **SOUTHERN CALIFORNIA**

- Remnants of former Hurricane Rosa will remain well east of the area, but an unseasonably deep trough will spread scattered showers and isolated thunderstorms over the area late tonight into Wednesday. Below average temperatures will persist through the end of the week.
- Isolated showers and thunderstorms will be possible across the Sierras today, but most areas will not see any precipitation until tonight or Wednesday.
- Scattered showers and isolated thunderstorms will occur along the central coast during the overnight hours tonight which will spread eastward over the rest of the district by noon Wednesday. Storm total precipitation will be 0.10" – 0.25" over most areas before the precipitation ends Wednesday evening. Some south aspects of Southern California may see around 0.50 – 1.00" with highly variable amounts due to convection.
- Temperatures 8-10 degrees below normal Wednesday through Saturday with highs in the 50s and lower 60s in the mountains to the upper 70s to lower 80s in the valleys.
- Gusty northwest winds possible along the central coast late this week through the weekend, but no offshore flow is expected.
- Expect uncommonly high relative humidity (RH) through Thursday, then turning seasonally dry this weekend with marine layer coverage increasing.
